LinkedIn: linkedin.com/in/harikrishna-b | Professional Application Support Engineer

PROFESSIONAL SUMMARY

Results-oriented **Application Support Engineer** with over 3 years of experience at HCL Technologies. Expertise in managing enterprise-scale applications, automating operational workflows using scripting, and ensuring high system availability through proactive maintenance and server patching. Proven track record in resolving complex technical issues (L2/L3 support) and streamlining onboarding processes within the healthcare and finance domains.

WORK EXPERIENCE

Application Support Engineer (Software Engineer)

2022 – Present

HCL Technologies | Madurai, India

- **Lead Support:** Serving as the primary technical lead for the PS Web-Medical Enrollment module, managing 6 mission-critical enterprise applications for global clients.
- **Automation & Efficiency:** Developed and implemented **BOMA scripts** to automate repetitive system checks, improving operational efficiency by reducing manual effort in routine tasks.
- **System Maintenance:** Orchestrated server patching cycles, system restarts, and routine environment health checks to ensure 99.9% uptime for client environments.
- **Incident Management:** Resolved high-priority tickets (Incident, Change, and Service Requests) using **ServiceNow**, maintaining strict adherence to SLAs.
- **Access Governance:** Managed end-to-end access provisioning and resolved complex authentication issues using Adam Web, ensuring secure and compliant user onboarding.
- **Financial Operations Support:** Facilitated Virtual Credit Card (VCC) transitions and resolved finance-related claim discrepancies through cross-functional coordination.
- **Stakeholder Communication:** Deliver weekly performance analytics and operational reports to Directors and management, highlighting system health and resolution trends.

Graduate Engineer Trainee

2021 – 2022

HCL Technologies | Madurai, India

- Provided foundational technical support for user onboarding and remote system troubleshooting using VNC Viewer and Citrix.
- Coordinated with external hardware vendors (GPS Platform) for critical infrastructure support, including printer and fax monitoring systems.
