PROFESSIONAL SUMMARY

Results-driven **Application Support Engineer** with **4 years of professional experience** at HCL Technologies. Specialized in **Transport & Logistics backend operations**, maintaining high-availability enterprise applications and optimizing supply chain data workflows. Expert in server patching, automated system monitoring via BOMA scripting, and providing comprehensive technical support to ensure 24/7 continuity.

WORK EXPERIENCE

Application Support Engineer (Transport Backend)

2021 – Present

HCL Technologies | Madurai, India

- **Logistics System Management:** Lead for transport backend modules, managing 6 critical enterprise applications for fleet tracking and logistics data coordination.
- **Infrastructure Maintenance:** Execute routine server patching, system restarts, and environment health checks to ensure zero-downtime for transport databases.
- **Data Automation:** Developed custom BOMA scripts to automate repetitive logistics data processing, improving operational accuracy and efficiency.
- **Access Governance:** Resolve high-priority login issues using Adam Web, facilitating secure onboarding for dispatch and logistics personnel.
- **ITSM Management:** Manage Incident (IR) and Change Requests (CR) via ServiceNow, consistently exceeding defined SLA targets for transport systems.
- **Vendor Coordination:** Managed logistics hardware infrastructure, including warehouse printer and monitoring systems, ensuring uninterrupted terminal connectivity.
